NOAA's Stellwagen Bank National Marine Sanctuary seeks advisory council applicants

NOAA's Stellwagen Bank National Marine Sanctuary is seeking applicants for five alternate seats on its advisory council. The council ensures public participation in sanctuary management and provides advice to the sanctuary superintendent.

"Each of the members brings a unique perspective to the council based on their long experience in the New England area," said Craig MacDonald, sanctuary superintendent. "Since its establishment, the council has played a vital role in advising the sanctuary and NOAA on critical issues. We are very pleased that council members offer their considerable talents to help us manage the resources of Stellwagen Bank National Marine Sanctuary."

The sanctuary is accepting applications for the following alternate seats: at large; business industry; mobile gear commercial fishing; whale watch; and youth.

Candidates are selected based on their expertise and experience in relation to the seat for which they are applying, community and professional affiliations, and views regarding the protection and management of marine resources. Applicants who are chosen as members should expect to serve a three-year term.

The advisory council consists of 36 primary and alternate members representing a variety of public interest groups. It also includes six governmental seats representing Massachusetts Environmental Police, Coastal Zone Management, Division of Marine Fisheries, New England Fisheries Management Council, NOAA Fisheries and U.S. Coast Guard.

Applications are due February 29. To receive an application or for further information please contact Elizabeth Stokes via email at Elizabeth.Stokes@noaa.gov; by phone at 781-545-8026, ext. 201; or by mail at 175 Edward Foster Road, Scituate, MA 02066. Applications can also be downloaded from the sanctuary's website at http://stellwagen.noaa.gov/.

Stellwagen Bank National Marine Sanctuary encompasses 842 square miles of ocean, stretching between Cape Ann and Cape Cod. Renowned for its biological diversity and remarkable productivity, the sanctuary is famous as a whale watching destination and supports a rich assortment of marine life, including marine mammals, seabirds, fishes and marine invertebrates. The sanctuary's position astride the historic shipping routes and fishing grounds for Massachusetts' oldest ports also makes it a repository for shipwrecks representing several hundred years of maritime transport.

NOAA's mission is to understand and predict changes in the Earth's environment, from the depths of the ocean to the surface of the sun, and to conserve and manage our coastal and marine resources. Join us on Twitter, Facebook, Instagram and our other social media channels.
